AMENDMENT AND REMARKS IN SUPPORT OF A REQUEST
FOR CONTINUED EXAMINATION PURSUANT TO 37 CFR 1.114

Please amend the above-referenced application as follows:

In the Claims:

1. (Amended) A disc brake rotor having a grey cast iron composition, wherein said composition comprises between 0.675 and 1.2% by weight of copper, and a plurality of hard carbide forming metals including both vanadium and titanium, the vanadium content being between 0.35 and 0.45% by weight and the titanium content being between 0.025 and .035% by weight, the ratio between the weight of copper present and the total weight of said hard carbide forming metals being 1.8 to 3 units of copper to 1 unit of the hard carbide forming metals.
